Evidence of Honors, Competitions & Selected Projects

+55 19 98842-1842 | ricardo.fferreira@icloud.com | LinkedIn | São Paulo – SP

Purpose of this document
This document compiles supporting evidence for selected academic, innovation, entrepreneurship, software and technology achievements. It is intended as a compact evidence portfolio accompanying an academic application/CV.

Selected Honors & Competitions

• **WWDC 2020 Swift Student Challenge** award winner – Apple	Online
• Finalist – Management Cancer Hackathon 2019	Germany
• Semifinalist – HackBrazil 2018/2019, challenge from Harvard and MIT universities	USA
• **2nd place** – HealthTech Innovators Award 2018, Groupe Mutuel	Switzerland
• Finalist – ICC International Create Challenge 2018, Idiap Research Institute	Switzerland
• **Winner by popular vote** – 2018 Inova Unicamp Challenge	Brazil
• **Winner** – WWDC 2018 Apple Scholarship	USA
• Finalist – Microsoft's Imagine Cup LATAM 2018	Brazil
• **Winner** – Motorola and Ford Hackathon 2017	Brazil

How the evidence is organized

- **Awards and competitions:** summarized first so the evaluator can quickly identify the most relevant distinctions.
- **Project evidence:** selected photographs are paired directly with the corresponding project, award or presentation.
- **Independent verification:** external articles, official competition pages, videos and institutional sources are listed next to the relevant evidence.
- **Project impact:** where supported by the original material, the document records concrete outcomes such as customers, countries reached and use of Artificial Intelligence.

Note: The links and descriptions in this document are based on the supporting material compiled in the original evidence portfolio.

1. LeukoCounter — HealthTech Innovation Project

LeukoCounter — Pitch at InovaBra

Brazil

Presentation of the project to an executive bench

The LeukoCounter project focused on helping biomedical and healthcare professionals count white blood cells. The original material documents presentations and external coverage of the project, including its progression through innovation competitions.

External evidence:
Baixada de Fato – article about the project
UNICAMP – Microsoft Imagine Cup finalists
PEGN – Imagine Cup Latin America

HealthTech Innovators Award 2018

Switzerland

2nd place — Groupe Mutuel

The project received **2nd place** in the HealthTech Innovators Award 2018 from Groupe Mutuel. The original portfolio includes photographic evidence of the award and the project's participation in the international innovation program.

External evidence:
Biomedicina Padrão – article about LeukoCounter
International Create Challenge – winners
ICC Demoday – project pitch

International Create Challenge 2018

Switzerland

Finalist / selected for one-month incubation

LeukoCounter was selected among the teams for a one-month incubation in Switzerland. The original document also provides a team photograph and links to the International Create Challenge announcement and the project pitch.

External evidence:
ICC – Winners of the 2018 edition
InnoPeaksCH – announcement
Team overview video

2. Inova Unicamp Challenge — DoTrack

DoTrack

Inovictus Team

Winner by popular vote
2018 Inova Unicamp Challenge

DoTrack was a project that used long-range RFID (patented by UNICAMP) to increase efficiency in the supply chain.

External evidence
São Paulo State Government – 2018 Unicamp Challenge

The original portfolio identifies the event photograph as the “UNICAMP 2018 Challenge Award” and records the presence of UNICAMP rector Marcelo Knobel and INOVA coordinator Newton Frateschi.

3. Apple WWDC Scholarship — Personal Software Project

WWDC 2018 Apple Scholarship

Personal software project

The original material states that the project was developed personally and that it resulted in the **WWDC Scholarship 2018**.

The project was focused on education, with the aim of increasing the interest of young people in science during primary and secondary education.

External evidence
Project video

The photograph documents the scholarship winners with Tim Cook, Apple CEO.

5. Additional Competition Record

Management Cancer Hackathon 2019	Finalist — Germany.
HackBrazil 2018/2019	Semifinalist — challenge from Harvard and MIT universities, USA.
Microsoft Imagine Cup LATAM 2018	Finalist — Latin American stage.
ICC International Create Challenge 2018	Finalist / selected for the international program in Switzerland.
WWDC 2020 Swift Student Challenge	Award winner — Apple, online edition due to Covid-19.

Project Development and External Coverage

LeukoCounter project trajectory

The original evidence portfolio describes LeukoCounter as a project designed to provide agility to biomedical and healthcare professionals by helping count white blood cells. The first version provided simplified counting, automatic reports and sharing among health professionals. The material states that the project reached over 500 paying customers in more than 40 countries, and that the later LeukoMatic version used Artificial Intelligence to count automatically.
